

The game

The Mafia, also known as the Werewolf, is a group and argumentative game that simulates a battle between a conscious minority and an unconscious majority.

In general, in this game, the power of speech, maintaining composure and making logical arguments play an important role in victory. Players are secretly identified; Mafias know each other and citizens who are only aware of the number of Mafia members and a few of them are aware of some maps. In the night phase of the game, Mafia members secretly kill a citizen. The doctor tries to save the person whom the Mafia wants to kill. The detective also seeks to identify the Mafia, and if he identifies the Mafia, he must prove to other citizens by argument that he is a Mafia. Mafia, doctor, citizen and detective are the main characters of the game and other characters such as sniper may be added to the game in other games. During the day phase, all surviving players discuss mafia identities and vote to remove a suspect.

The game continues until all the Mafia are out of the game (citizens win) or the number of Mafia and citizens is equal (Mafia wins) or one of the independent characters, each with a different winning condition, wins the game. In a game, the characters usually have to be arranged in such a way that for each character, there are opposite and complementary characters.

**What roles take action in
game?**

ME
m a f i a t o r

Hi guys!! I am Lord,the game engine written by mafiator team.
I know everything about player roles. I manage game events,messagings and
turns for you.
You just enjoy.

GODFATHER

m a f i a t o r

He is the most powerful character in game and leader of mafias. At night he decides to kick a player in consultation with the other mafia. The godfather inquiry is always negative for the detective. Rifle shooting during the day or sniper shooting at night has no effect on Godfather and the only way to expel him from the game is to vote during the day.

MAFIA

m a f i a t o r

Like everyone else, he has the right to speak, vote and participate in decision-making at night

and during the day, he should try to mislead the citizens

NATASHA

m a f i a t o r

She is one of the black roles of citizens. She can silence someone every night, even if he is a member of his own team. Natasha's task while being a citizen is to help the Mafia win.

TERRORIST
m a f i a t o r

He is a member of the Mafia and the answer to the detective's inquiry is positive.

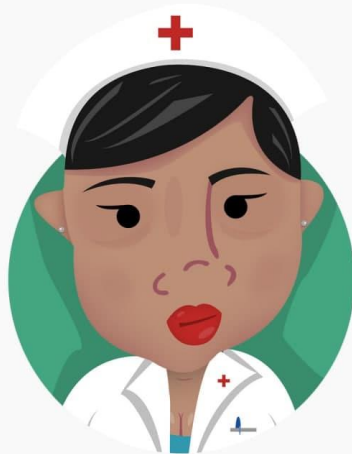

If he is removed during the day phase and by the vote of the citizens, he can take someone out with her

DETECTIVE

m a f i a t o r

He is a member of the city. Every night, he inquires about a person who is suspected of being a mafia. The godfather inquiry is always negative

DOCTOR
m a f i a t o r

He is a member of the Citizens' Team. At night he can save himself or anyone else who feels he/she has been shot.

IMMORTAL

m a f i a t o r

He is a member of the citizens' team and in fact the strongest citizen in the game.

In the night phase, it is safe from any shot and the Mafia can only oust him during the day by voting.

His main power is that it can ask God at night what roles left the game.

SNIPER

m a f i a t o r

He is a member of the citizens' team. During the night, he can shoot one of the people who feels that he is not a member of the citizens. His shot has no effect on the immortal or the person who was rescued by the doctor; in this case the lord declares that his shot was stoned.

If the godfather shoots the sniper, the sniper shooting has no effect on anyone.

PRIEST

m a f i a t o r

He is a member of the Citizens team who plays against Natasha. That is, if the priest chooses the person who has been silenced by Natasha correctly, that person will not be silent and can still speak in the game. If the priest makes the wrong choice, that person will receive an "extra speech." That means he can talk more than the allotted time for each player.

BUTLER

m a f i a t o r

He is a member of the city. He can make a person drunk every night and that person will not do his job. If he points to the godfather, his shooting will be ineffective. If he points to Natasha, Natasha will be silent. If he points to the detective, his inquiry will be reversed and if he points to the doctor, he can not save anyone.
